Good afternoon Katrina and Todd,

We will have our team come out to the Wilcox site on the 24th this week to look over the area, especially those by the waterways for any plants that are considered Traditional Cultural Properties (TCPs).

As far as the GPR data goes, we will review that when the report is submitted to us. As I mentioned before, that will be data that the archaeological firm that you hire will also surely want to look at and possibly analyze. Since the purpose of the data collection is not for cultural resources, it would be good if you could share that with your archaeological contractor.

Have the other Tribes been contacted as well, particularly the tribes that were indigenous to OK, such as the Osage, Caddo and Wichita? They may also want to come to the site sometime this week if their schedule allows.

Could you please tell us who EPA has contracted to do the archaeological phase I survey?

Thank you,

Ms. Johnnie Jacobs

Subject: RE: Wilcox Geophysics Field Action

Good Morning, I have received several responses and it looks as if Thursday, September 24 is the best day. Because the team will be out in the field, it will be easier for us to meet you in the church parking lot. So if it is possible, please provide me with the approximate time for your visit. Or if your schedule is fluid, please call the number listed below (214-665-8143) to contact me.

9750730

Also, should Thursday not provide you with the best opportunity to visit the site, please let us know what day works so that we can prepare for your visit.

thanks

Subject: Wilcox Geophysics Field Action

Good Morning, the field team is at the Wilcox site this week and next week. While out in the field they will be conducting geophysics surveys. During the August 26, 2015, meeting, several of you expressed interest in visiting the site and also conducting a traditional cultural properties survey. In addition, there was an expressed interest in reviewing the geophysics data being collected. Please let me know how best to coordinate these activities.

1. Please let me know the days you wish to visit the site. Tom Kady is the field leader. If Todd or I cannot be in the field on the days of interest to accompany you and your team, Tom will be available.
2. Please let me know how to provide the geophysics data for your review. I need to verify with Tom how the data will be presented, so I can provide the best means of review.

thanks
